KISAN CULTURE — AGRICULTURAL INTELLIGENCE DOSSIER

Smarter Farming · Stronger Harvests · Aligned with ICAR Package of Practices

Dossier ID: KC-REP-F87F2E	**Generated On:** 27 October 2026
Target Crop: Wheat (HD-2967)	**Field Location:** Taraori, Karnal, Haryana
Tools Executed: crop_health, weather_guardian, soil_advisor	**Validation Status:** Grounded ICAR Rules

Wheat Integrated Agronomic & Weather Advisory Dossier

Evaluated lower-leaf chlorosis against local weather risks and soil alkalinity (pH 7.8). Identified Nitrogen mobility stress rather than Stripe Rust.

PRIORITIZED FARMER ACTION ROADMAP

Timeframe	Scientific Action & Practice	Critical Safety Caution
Immediate (Today)	Check field drainage outlets.	*Do not broadcast urea today.*
In 2-3 Days	Conduct white cloth rub test.	*Apply foliar 2% Urea only when dew evaporates.*

REGULATORY NOTICES & FIELD ADVISORY DISCLAIMERS

- Advisory generated using ICAR Package of Practices.
